

## MEXICO

### Conferencia Septentrional (Northern Conference) Huastecas District

This district is primarily in the state of Hidalgo, approximately 80 miles north of Mexico City, with some churches in the states of San Luis Potosi and Tlaxcala.

The area is primarily rural and agricultural, with severe levels of poverty. The Methodist Church in this area is small, with a number of developing congregations meeting in homes or partially completed structures. A recent UMVIM exploratory team has gathered information to help teams in their plans for service.

Project Name: Templo "Getsemani" - Pachuca, Hgo.

Project Location: Pachuca, Hgo.

For the first time in this area, land has been donated by the government to construct a Church. The brand new Church construction will be in a new government housing development.

Each of the Church members have been asked to contribute funds for 1 square meter.

Hundreds of homes are under construction nearby, surrounding the church property

The Church building is planned to be 29m x 22m.
